Key Geometric Properties and Theorems

Understanding core properties and theorems is essential to solving problems efficiently and accurately.

Congruence and Similarity

- Congruent figures: Have the same size and shape (e.g., congruent angles or segments). - Similar figures: Have the same shape but not necessarily the same size; their corresponding angles are equal, and sides are proportional. Important Theorems & Criteria: - SSS (Side-Side-Side): If three sides of one triangle are proportional to three sides of another, the triangles are similar. - SAS (Side-Angle-Side): If two sides are proportional and the included angles are equal, the triangles are similar. - AA (Angle-Angle): If two angles of one triangle are equal to two angles of another, the triangles are similar.
