Common Python Interview Questions on Mettl

The following sections highlight typical questions asked during Mettl assessments, categorized based on difficulty and topic.

Basic Python Questions

1. **What are Python's key features?** - Easy to read and write - Interpreted language - Dynamically typed - Supports multiple paradigms (procedural, object-oriented, functional) - Extensive standard libraries 2.

Explain Python data types with examples. - Numeric types: `int`, `float`, `complex` - Sequence types: `list`, `tuple`, `range` - Text type: `str` - Mapping type: `dict` - Set types: `set`, `frozenset` - Boolean: `bool` 3. **How does Python handle memory management?** - Python uses an automatic garbage collector for memory management. - Memory is allocated dynamically for objects and deallocated when no longer in use. 4. **What are Python functions? How are they defined?** - Functions are blocks of reusable code. - Defined using the `def` keyword:

```
def greet(name): return f"Hello, {name}"
```

Intermediate Python Questions

1. **Explain list comprehensions with examples.** -

Concise way to create lists:

```
squares = [x2 for x in range(10)]
```

 - Enhances code readability and efficiency. 2.

What is the difference between `deepcopy` and `copy`? - `copy()` creates a shallow copy; nested objects are references. - `deepcopy()` creates a new object and recursively copies nested objects. 3. **Describe Python's exception handling mechanism.** - Uses `try`, `except`, `else`, and `finally` blocks. - Example:

```
try: result = 10 / 0
```

except ZeroDivisionError: print("Cannot divide by zero")

4. What are Python decorators? - Functions that modify the behavior of other functions. - Syntax: def decorator(func): def wrapper(): print("Before function call") func() print("After function call") return wrapper

Advanced Python Questions

1. Explain Python generators and their advantages. -

Generators produce items lazily, saving memory. -

Created using `yield`: def count_up_to(n): count = 1

while count <= n: yield count count += 1

2. Discuss Python's GIL (Global Interpreter Lock) and its

impact on concurrency. - GIL allows only one thread to

execute Python bytecode at a time. - Limits true

parallelism in multi-threaded programs, affecting CPU-

bound tasks. - Multi-processing can be used to achieve

parallelism. **3. What are metaclasses in Python?**

Provide a use case. - Metaclasses define how classes

behave. - Used for class customization, validation, or

automatic method addition. - Example: class Meta(type):

def __new__(cls, name, bases, dct): dct['created_by'] =

'MetaClass' return super().__new__(cls, name, bases, dct)

class MyClass(metaclass=Meta): pass

4. Describe the concept of Python's context managers and the

`with` statement. - Context managers handle setup and

teardown actions. - The `with` statement simplifies

resource management: with open('file.txt', 'r') as file: data

= file.read()

Cost efficiency and accessibility

eBooks are often more affordable than printed editions, and many free or open-access titles are available legally. This accessibility lowers barriers to education and knowledge, enabling more people to benefit from

resources like Python Interview Questions Programming Mettl. Digital distribution also allows faster updates and revisions, ensuring access to current information.

Highlighting and Notes

Highlighting and note-taking tools are among the most valuable features of eBooks. Built-in annotation tools allow readers to interact directly with Python Interview Questions Programming Mettl, turning reading into an active and engaging process. Highlighting important sections helps identify key ideas, definitions, or arguments that require further review.

Digital notes can be added alongside highlighted text, enabling readers to record thoughts, questions, or summaries in context. These annotations remain linked to the original content, making it easier to revisit and understand notes later. Unlike handwritten notes, digital annotations are searchable and editable, enhancing long-term usability.

Many eBook platforms allow users to export notes and highlights. Exported annotations can be used for revision, research, presentations, or collaborative study. This feature is particularly useful for students and professionals who rely on organized summaries and references.

Color-coded highlights add another layer of organization. Different colors can represent themes, importance levels, or types of information. For example, one color may be used for definitions, another for examples, and another for questions. This visual system improves clarity and speeds up review sessions.

Annotations can also evolve over time. As understanding deepens, notes can be edited, expanded, or refined. This flexibility supports iterative learning and continuous improvement, allowing Python Interview Questions Programming Mettl to grow alongside the reader's knowledge.
