Common Questions and Their Correct Approaches

Let's review some typical questions you might encounter and the best answers to approach them.

Q1: What should you do if you suspect a security breach?

Answer:

Immediately report it to the designated security officer or supervisor without attempting to investigate or resolve it yourself. Prompt reporting helps contain potential damage and allows for proper investigation.

Q2: Is it acceptable to share your login credentials with coworkers?

Answer:

No. Your login credentials are personal and should never be shared. Sharing passwords violates security policies and can compromise data integrity.

Q3: How should you handle sensitive criminal justice information?

Answer:

Access and handle it only when authorized and necessary for your job. Ensure it's stored securely, transmitted securely (using encryption if applicable), and disposed of properly when no longer needed.

Q4: What are the best practices for creating a strong password?

Answer:

Use complex passwords that include a mix of uppercase and lowercase letters, numbers, and special characters. Avoid easily guessable information like birthdays or common words. Change passwords regularly and do not reuse passwords across multiple systems.

Q5: What is the purpose of encryption in CJIS security?

Answer:

Encryption protects data from unauthorized access during transmission and storage, ensuring confidentiality even if data is intercepted or stolen.
